

Miss S. H. Downing.

Journal of a Voyage at Sea in the Ship  
Frances of New Bedford.

Remarks whilst on board.

Wednesday Nov 1<sup>st</sup> 1843... Weighed anchor opposite to the  
Light House at 7 A.M. Gentle breeze of wind and pleasant  
At 5 P.M. the wind began to rise and we experienced a gale  
of wind during the night. All hands sea sick except 3.  
Thus Nov 2<sup>nd</sup> At 11 A.M. the wind shifted to the N.W. and  
cleared off with a good breeze. At 5 P.M. Spoke a Hermaphrodite  
Brig bound to Portland. Crew sick. Brid Nov 3<sup>rd</sup> Fair wind  
sailing under top sails. Crew getting better of sea sickness  
Sat. Nov 4<sup>th</sup> Fair wind and pleasant until 3 P.M. when the wind  
began to rise and we commenced furling sails. Heavy gale  
during the night. Sun. Nov 5<sup>th</sup> Gale continues. All sail furl'd  
except Fore-Topmast staysail and Main-Spencerf.

Ship's Branches in a Gale.

Wed. Nov 6<sup>th</sup> Wind blows hard, waves run high. At 4 P.M.  
made more sail and run under top sails. Tues. Nov 7<sup>th</sup>  
Sailing E. & S. wind dies away, sea falling fast. Wed. Nov 8<sup>th</sup>  
Good breeze and fair weather. Thurs. Nov 9<sup>th</sup> Sailing E. & S.  
Gentle breeze and clear sky. Saw a sail off our lee bow.  
Frid. Nov 10<sup>th</sup> Course E. & S. Good breeze Sath. Nov 11<sup>th</sup> Gentle  
breeze and fair weather. Sun. Nov 12<sup>th</sup> Packed ship.  
Course N.W. & E. very calm during the day. Wed. Nov 13<sup>th</sup>  
Light breeze and clear weather. Thurs. Nov 14<sup>th</sup> sailing  
E. & S. Good breeze. Saw a sail off our weather bow.  
Wed. Nov 15<sup>th</sup> Fine weather but contrary winds.  
Thurs. Nov 16<sup>th</sup> Course N.W. & E. Saw a sail off our lee bow.  
Frid. Nov 17<sup>th</sup> Good breeze but not fair. Sat. Nov 18<sup>th</sup> very  
pleasant with a light breeze. Sun. Nov 19<sup>th</sup> very calm  
At 4 P.M. hauled 4 boats to exercise the crew. Thurs. Nov 20<sup>th</sup>  
Saw a sail astern of us. saw a school of Porpoises. Tues. Nov  
21<sup>st</sup> light shower of rain in the morning. Saw a number  
of Black Fish. Wed. Nov 22<sup>nd</sup> Good breeze with a shower of  
rain. Thurs. Nov 23<sup>rd</sup> squally during the day. Saw a  
sail off our weather bow.

Sunday Nov. 24<sup>th</sup> A light easterly wind and rain. Saw a sail astern of us supposed to be a whaler. Sat. Nov. 25<sup>th</sup> S. E. Breeze and fair weather. Sunday Nov. 26<sup>th</sup> Light breeze and pleasant. Monday Nov. 27<sup>th</sup> Sailing S. E. these 12 hours good breeze. Tues. Nov. 28<sup>th</sup> Course S. E. light breeze. Trade winds. Saw a sail off our weather bow. Wednesday Nov. 29<sup>th</sup> Course S. good breeze of wind and pleasant. (Saw a sail off our lee bow. Thurs. Nov. 30<sup>th</sup> Course S. W. W. Good breeze. saw a sail off our lee quarter. December 1<sup>st</sup> saw a sail off our weather bow. Dec. 2<sup>nd</sup> Course S. W. W. Good breeze and pleasant. Sunday Dec. 3<sup>rd</sup> Course S. E. pleasant weather smoky air. At 1. P.M. saw land off our lee bow, St. Anthony one of the Cape de Nord Islands. This is a rocky and mountainous island, the hills and mountains are covered with moss: in the valleys the inhabitants grow oranges and coconuts. Monday 4<sup>th</sup> Good breeze rather hazy. Saw an English Brig man of war.

Tues. Dec. 5<sup>th</sup> Came up with this land at 6 A.M. At 3 A.M. lowered a boat and went on shore to trade with the natives. Here we traded for swine and fowls. This is a beautiful and fruitful island producing oranges, coconuts, sugar-cane in abundance. On this side of the island is a small village with a few poor and decayed buildings. Built of small stone, the roofs thatched with long coarse grass. On the opposite side of this island is a large town containing many inhabitants. The people of this place are mostly Portuguese of a black and copper complexion, misshapen and some of them go entirely naked. Dec. 6<sup>th</sup> Lowered a boat and went to the island for fruit. returned with a beautiful lot of oranges and coconuts, divided the fruit giving each one 70 oranges, 5 coconuts. At 4 P.M. set 21 strings sail and shaped our course for Cape Horn.

Thurs. Dec 7<sup>th</sup> Light breeze and very pleasant during the day. Frid. Dec. 8<sup>th</sup> Light breeze clear and warm. Sat. Dec. 9<sup>th</sup> Light breeze and as warm as it is at home in June. Day and night is uncomfortable with thin clothes. Sun. Dec 10<sup>th</sup> Calm  
5 very calm and pleasant. Monday Dec 11<sup>th</sup> Course S some square and showers of rain. Tues. Dec 12<sup>th</sup> very calm, clear and warm the first 6 hours, showery during the night. Wednes. Dec 13<sup>th</sup> Course SSW showery during the day. Thurs. Dec 14<sup>th</sup> Good breeze. Saw a sail 2 points off the weather bow. Frid. Dec 15<sup>th</sup> Course SW by S. Good breeze at 1 P.M. crossed the Equator Sat. Dec 16<sup>th</sup> Strong breeze. Sun. Dec 17<sup>th</sup> pleasant agreeable weather. Sun Dec 24<sup>th</sup> At 10 A.M. saw Martinmas Rocks and Trinidad.

Northeastern View of Martinmas Rock  
This is a large mass of rocks in the ocean some distance from any other land, not a shrub of any kind or any green thing except moss grows here. Mon. Dec 25<sup>th</sup> Course SW warm and showery. Tues. Dec 26<sup>th</sup> Showery and squally. Wednes. Dec 27<sup>th</sup> Light breeze and overcast. Thurs. Dec 28<sup>th</sup> very pleasant. Frid. Dec 29<sup>th</sup> The first 12 hours light breeze the last 12 strong breeze and cloudy. Sat. Dec 30<sup>th</sup> Flying clouds rather squally. Sun. Dec 31<sup>th</sup> Variable winds but warm and pleasant. This ends the year.  
Monday January 1<sup>st</sup> 1844 Course SW Lat 34.56 Very calm clear and warm. Tues. Jan 2<sup>nd</sup> Course SW Lat 32.26 Lon 40.59 Light winds warm and pleasant. 2700 lbs. Unable to write by reason of a lame hand.  
Feb 15<sup>th</sup> Spoke ship America of Bristol R.S. homeward to  
Naparalso. very leaky short of provisions without  
Fore Top Gallant sail or Flying jib and no spare sail.

8 Distant view of the Island of Juan Fernandez.

Sat. Feb. 24<sup>th</sup> Came up with this land at 4 P.M. It was a calm and beautiful day not a cloud in the horizon, not a break on the surface of the broad blue ocean as far as the eye could reach. but a smooth or rolling which lightly rocked our gallant craft as we lay a viewing the hills and mountains of granite.

Sun. Feb 25<sup>th</sup> Lowered 2 boats and went onshore to gather peaches and quinces which this island produces in great abundance. This place it is said was once the residence of Alexander Selkirk and the famous Robinson Crusoe who caught Lamas with ladders made of the bark of trees and hewed out the trunk of a tree of which he made him a boat thinking to make his escape to the coast or some other place and many other stories are told in his life which would take a generation to find true. Notwithstanding the many stories, it is a fine island producing peaches, quinces, and figs and soon to produce much that is valuable were it cultivated. This island has been inhabited by some Spaniards who have erected some huts and a small fort and who remain here till September 1842 when they were taken to the east to be tried for the murder of a Scotchman who was on the island previous to their settlement.

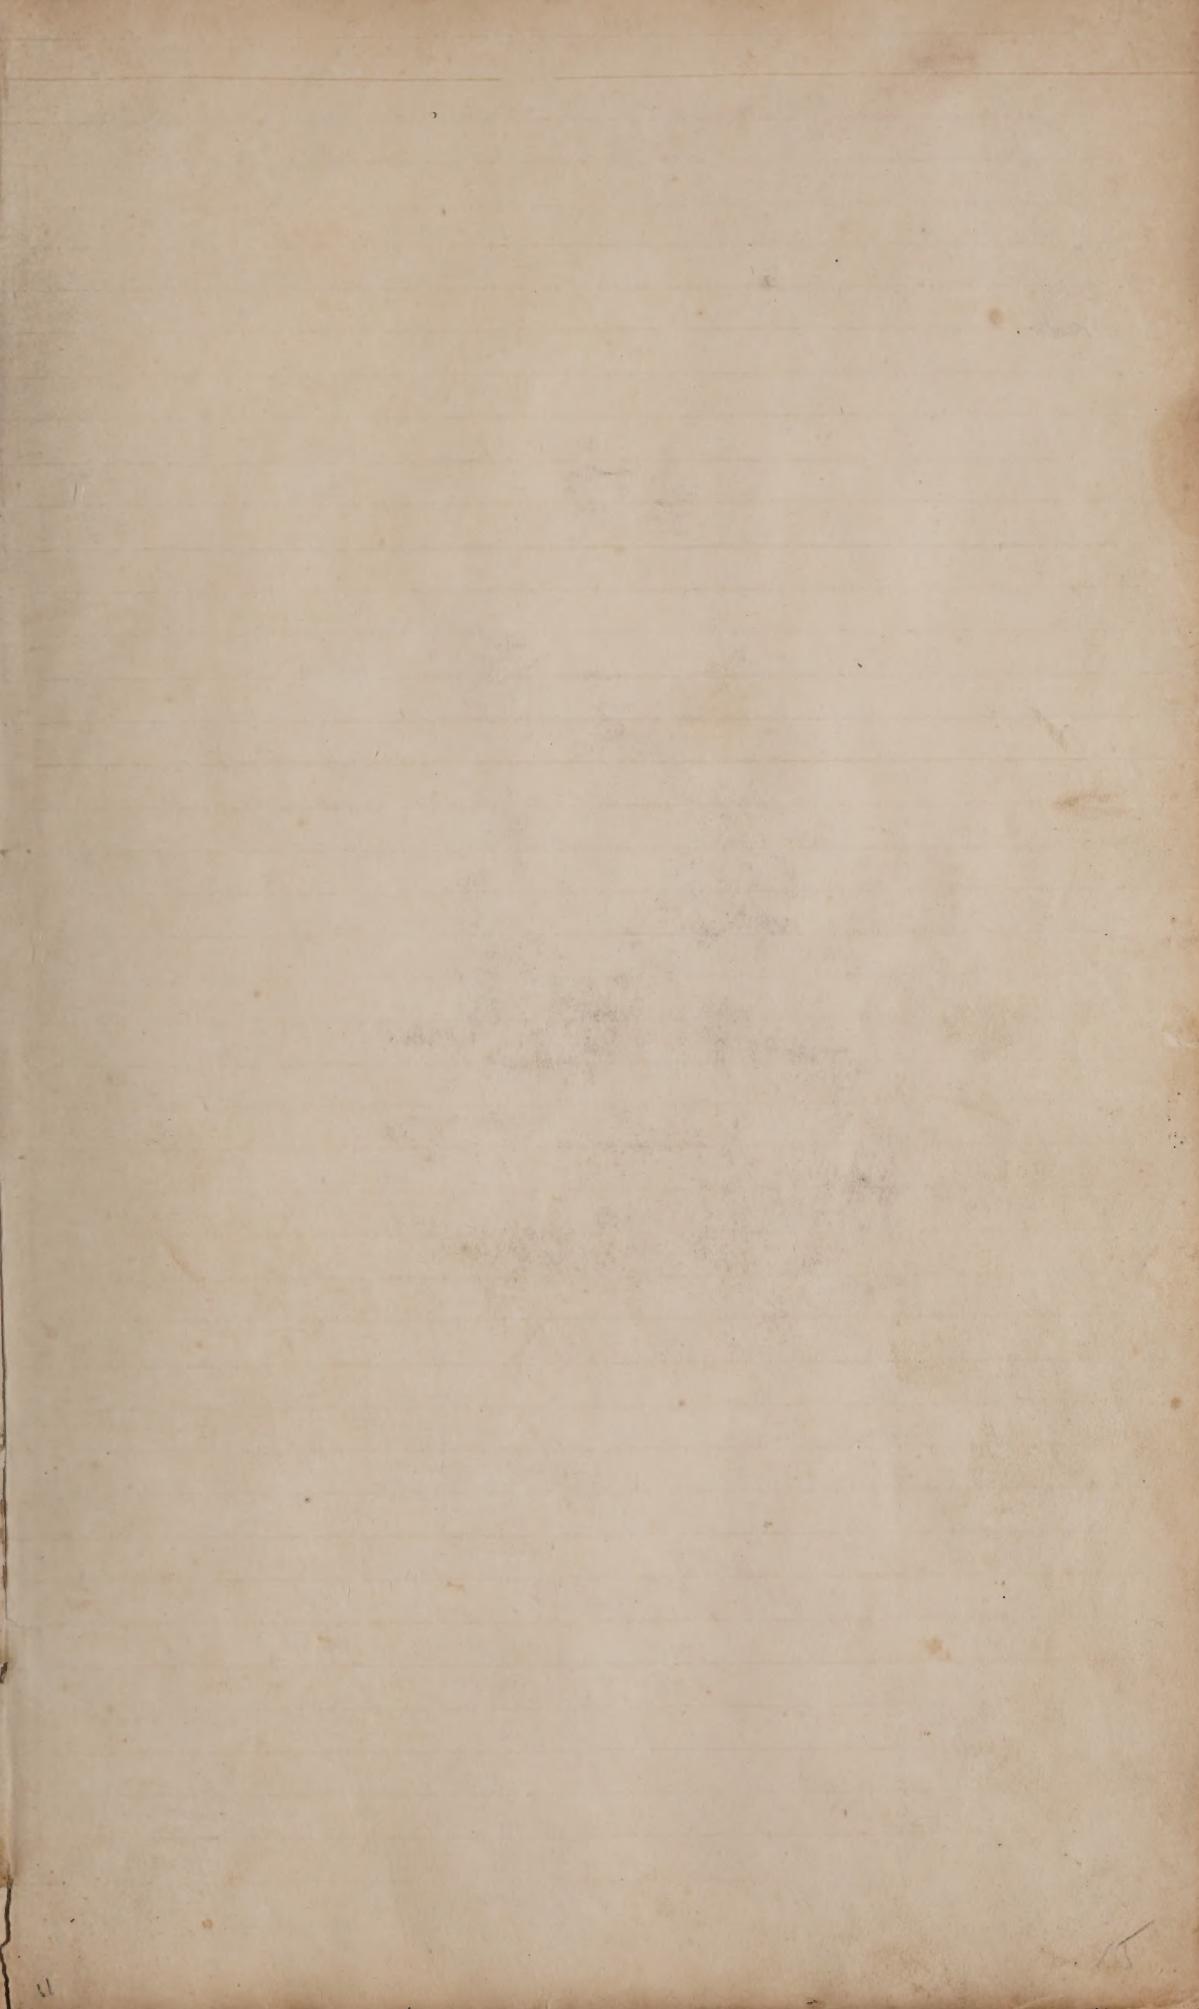

We gathered some peaches but they were not quite ripe.

Feb 29<sup>th</sup> Spoke Ship Daniel Webster of Nantucket 8 mrs. the out 300 t. lbs sperm oil March 4<sup>th</sup> Spoke Ship 200 t. lbs of New Bedford Spoken Master Capt came on board. March 5<sup>th</sup> Spoke Ship Coral of New Bedford 16 months out 950 t. lbs sperm oil.

Sunday, Dec, 31<sup>th</sup> Course SW Variable winds but pleasant. At 7<sup>th</sup> A.M the sun sets here and 12 this night closes the year.

Sun. March 10<sup>th</sup> Spoke Ship Rambler of New Bedford and  
George of Fairhaven Capt. came on board. Dowered  
2 coats and went on shore at Juan and gathered peaches  
and quinces. Mond. March 11<sup>th</sup> Cool and cloudy during the  
day. Tues. March 12<sup>th</sup> Spoke Ship Virginia and Basque  
J. Henry of New Bedford. Thurs. March 14<sup>th</sup> Spoke  
Ship Banny of Sag Harbor 3 $\frac{1}{2}$  months out. Capt. G.  
bought some onions and potatoes of him. Sat. March 15<sup>th</sup>  
Saw 2 sail at a distance.

## Wine of St. Felix and Barque Equator.

Mon. March 18<sup>th</sup> Came up with this island at 1 P.M. and one boat went to the island for fish. This is one huge mass of rocks not a shrub, nor any green thing is to be found here. I Spoke Barque Equator at this island 5 months out 30 lbs spermaceti oil.

and wife of Payta Perez.

April 10<sup>th</sup> came up with this port at 10 A.M. Capt. wen  
on shore and purchased some sweet potatoes. This place  
is situated at the foot of a large bank, and is so high that  
a view of the country can't be had from the tops of  
the tallest steeples. Back from this place lies a large district  
of sand and loam, without a tree, or shrub, or any signs  
of vegetation. Their produce is brought a great distance  
and their water 9 miles. The buildings are chiefly composed  
of bamboo and mud, and principally one story high. The

inhabitants are mostly Spaniards. Dark countenance, black hair and black eyes, very fond of smoking and drinking. Sun. Apr. 21<sup>st</sup> Saw a school of sperm whales lowered 4 boats broke 3 oars and caught nothing. Tues. Apr 23<sup>rd</sup> Spoke the Barque Equator and sailed in company with her to Chatham island.

### A View of Chatham Island.

Wednesday Apr. 27<sup>th</sup> Came up with this island about 1 P.M. and let go anchor. two boats went to the island after Turpint. at this place we painted ship. This is a rocky barren island covered with small trees and shrubs. One small hut situated on the sea shore is the only building on the island. and belongs to an Englishman who lives here and employs a number of men to gather Turpint oil, which is worth when taken to the coast \$1.50 per. gall. These Turpint are excellent food, the taste resembles that of a chicken they are taken in large quantities by people who are cruising around those islands for whale. they will live 6 or 8 months without food or water. Capt. G. purchased 70 of the Englishman which together with those we caught amounted to 90, we then weighed anchor and set sail for Charles island another one of the Galapagos. Tues. Apr. 30<sup>th</sup> Came to anchor at this island and traded with the natives for potatoes and bananas. This island is inhabited by transports from Columbia. who cultivate the land and raise sweet potatoes and some corn which they trade with masters of ships for clothing and other articles. May 1<sup>st</sup> Spoke Ship Tasker of New Bedford 33 months out 2300 sperm went on board of her a few hours. in Bay 9<sup>th</sup> Spoke Barque George Porter of New Bedford. May 18<sup>th</sup> Lowered for whales and caught one and a small calf the two made so little that I spoke Ship Bay of R.I. Sat. June 1<sup>st</sup> Spoke Barque Franklin of R.I. and Barque Bellows of Stonington.

Spoke Barque G. Porter at 2 P.M. saw sperm whale lowered down and fastened and lost the whale.

Sund Aug. 25<sup>th</sup> 1844. Spoke Ship John Cogswell of New Port

of New Bedford 9 months out 330 Sperm oil. Tues Sept 17<sup>th</sup>  
Lat 2.03 S Long 97.00 W Saw Sperm whales caught nothing  
Sund Sept 22<sup>nd</sup> off the Galapagos Spoke Ship Abigail of  
New Bedford 400 lbs Sperm oil. Mond Sept 30<sup>th</sup> Came to  
anchor at Bombay Persia. Ship Bay Barges Franklin and  
Equator at anchor at this port. At this port we recruited  
ship with water, fruits and sweet potatoes. This place is said  
to be the best on the coast for recruiting ship. The land  
bordering on the river is well adapted to the cultivation of  
corn, sweet potatoes, plantains and bananas, the country  
back from the sea is hilly and mountainous covered with  
trees and shrubs. In this country they have no roads which  
make it difficult for strangers to travel from one place  
to another without a guide. Near the shore is a few houses  
but the principal town is 9 miles back. The buildings  
at this place are somewhat better than at Beccinus they  
being built of bamboo and clay and some are whitewashed  
on the out side. At this place are some small shops or  
stores where you can obtain some articles similar to  
those we have in the states.

Bedford the Coral 1750 blb William Hart 4000 sperm 25 months out. Dec 24th Spoke ships Coral and Abigail of N. Bedford. At 4 P.M. saw whales off the lee bow did not it being near sunset. Dec 25th At 10 A.M. the Coral saw whales and set her signal for us she caught one whale we did not lower, whales too far to the windward.

8  
A view of a part of Tahantes Island.

Tuesday April 30<sup>th</sup> came to anchor at this island and traded with the natives for potatoes. This island is inhabited by transports from Columbia who cultivate the Taro and raise corn and sweet potatoes which they trade for clothing that they obtain of ships which stop here to recruit.

Spoke ship St. Lalle of Bedford 33 months out 2350 lbs of sperm oil. Spoke Barque George Foster of Bedford Saturday May 1 Sounded for whales and caught one which had 30 lbs. Spoke Barque Bay of R.S. Saturday June 6 Spoke Barque Franklin of R.S. and Barque Gibbons of Stonington

Sunday March 10<sup>th</sup> 1844 Spoke Ships Rambo  
of New Bedford and George of Winkhaven Captains  
came on board. Lowered 12 Boats and went on shore  
at Juan Fernandez and gathered Peaches and Quince.

Monday March 11<sup>th</sup> Cool and cloudy during the day.

Tuesday March 12<sup>th</sup> Warm and clear. Spoke Ship S.

Virginia and Barque Henry. Capt Gardner went

on board the Virginia and second Mate on board

the Henry.

Wednesday March 13<sup>th</sup> Cloudy and squally.

Thursday March 14<sup>th</sup> Cloudy and some rain. Spoke  
Ship Penny of Sache L. of 36 M. with out. Capt came  
on board. Mate went on board of them and brought off  
Onions and potatoes.

Friday March 15<sup>th</sup> warm and showery.

Saturday March 16<sup>th</sup> Showery during the day. Saw  
2 Sails at a distance.

Sunday March 17<sup>th</sup> Good breeze and pleasant.

A View of St Felix and Barque Equator.

Monday March 18<sup>th</sup> Came up with the island at 18<sup>th</sup> M.  
and boat crew went a fishing. This island is a bed  
of rocks, not a shrub, nor any green thing, is to be found  
there. Spoke Barque Equator of New Bedford at this island  
at 6 P.M. 5 months but 30 barrels Sperm Oil.

A View of Puerto Poer.

April 10<sup>th</sup> Came up with this port at 10 A.M. Capt. went on shore and purchased some sweet potatoes. This place is situated at the foot of a large clay bank which surrounds the port and is so high that a view of the country can not be had from the tops of the highest steeples. The inhabitants are principally Spanish and Portuguese.

Monday April 11<sup>th</sup>. Saw a school of Sperm Whales. Rowed 4 boats

broke 3 oars and was not so fortunate as to get any whales.

Tuesday April 12<sup>th</sup>. Spoke the Barque Equator and sailed in company with her to Chatham island. Wednesday April 13<sup>th</sup> came up with Chatham island at 12 at noon and anchored. 2 boats went on shore after Bumpkin. Thursday April 14<sup>th</sup> commenced painting ship. Friday April 15<sup>th</sup> finished painting ship.

A View of a part of Chatham Island.

This island is covered over with trees and shrubs, very rocky, not a place large enough to place a foot without cutting it on a stone. One small hut situated on the shore which belongs to an Englishman who resides here and employs a number of men for the purpose of gathering Bumpkin oil which is \$1.50 per gallon when taken to Columbia. Those bumpkin are excellent eating which supply those people with food the taste of their meat resembles that of a chicken. Capt G purchased 74 of the Englishman with those sweet potatoes \$1.90.

Who learns to feel anothers woes wings of fire. In  
Bows to the poor mans wants his ear quick and rapid  
And wipes the helpless orphans tear succession we are  
passing from time into Eternity

Part Journal of a voyage at sea in the ship  
Frances of New Bedford.

Remarks

Wednesday Nov. 1<sup>st</sup> 1843. At 7 A.M. weighed anchor opposite the Light House. Light breeze and pleasant. 5 P.M. strong breeze with a heavy sea which continued during the night most of the hands sea sick.

Thursday Nov. 2<sup>nd</sup> 11 A.M. wind N.W. strong breeze 5 P.M. Spoke a Hermon Indite Brig from Guadalupe bound to Portland N.E. Crew sick

Friday Nov. 3<sup>rd</sup> Strong breeze. Crew getting better of sea sickness

Saturday Nov. 4<sup>th</sup> The first 12 hours pleasant. 3 P.M. strong breeze heavy gale during the night.

Sunday Nov. 5<sup>th</sup> Gale continues. All sails furled except Fore Top Mast staysails and Main Spars. Torned Main Top Sail sheet and damaged Main Top Sail some

Ship Frances in a gale

Monday Nov. 6<sup>th</sup> Strong breeze. heavy sea. 4 P.M. sailing under Top Sails

Tuesday Nov. 7<sup>th</sup> Gale abates. Sea gathering fast.

Wednesday Nov. 8<sup>th</sup> Good breeze and pleasant weather.

Thursday Nov. 9<sup>th</sup> Course E.E.S. light breeze. Saw a sail on our lee bow.

Tuesday Nov. 14<sup>th</sup> Course E.E.W. Saw a sail on our weather bow.

Thursday Nov. 16<sup>th</sup> Saw a sail on our lee bow.

Sunday Nov. 19<sup>th</sup> Calm. At 4 P.M. lowered the boats to exercise crew.

Monday Nov. 20<sup>th</sup> Saw a sail astern of us.

Tuesday Nov. 21<sup>th</sup> Saw a school of Blackfish.

Thursday Nov. 23<sup>rd</sup> Saw a sail on our weather beam.

Friday Nov. 24<sup>th</sup> Light gale of wind. Saw a sail astern of us.

Wednesday Nov. 29<sup>th</sup> Saw a sail on our weather bow.

Thursday Nov. 30<sup>th</sup> Saw a sail on our weather quarter.

December 1<sup>st</sup> Saw a sail on our weather bow.

Sun. Dec 3<sup>rd</sup> 1843 Saw land. St Anthony one of the Cape Verde islands. This is a rocky and mountainous island the highest parts are covered with moss. but the valleys are fruitful producing oranges, coconuts, and sugar-cane in abundance.

Dec. 4<sup>th</sup> Saw an English man of war on our weather bow.

A View of St Jagoes.

Tues. Dec. 5<sup>th</sup> Came up with this land at 6 A.M. Lowered 2 boats and went on shore to trade with the natives for swine and fowls. This is a beautiful and fruitful island producing oranges, coconuts, sugar-cane in large quantities. On this side of the island is a few poor and decaying buildings built of small stone. the roofs thatched with long coarse grass. On the opposite side of this island is a large town containing many inhabitants. The natives of this place are mostly Portuguese. black and copper complexion. miserably clad and some of them go entirely naked.

Wed Dec 6<sup>th</sup> Lowered 2 boats and went to the island for fruit came off with oranges, and coconuts. Divided giving each 70 oranges and 5 coconuts. We then set studysails and shaped our course for Cape Horn.

Thurs. Dec. 14<sup>th</sup> Saw a sail on points off our lee bow.

Frid. " 15<sup>th</sup> At 9. A.M. crossed the equator.

A View of Martin Vaz Rock.

Sun. Dec 24<sup>th</sup> Saw this island. This is a huge mass of rocks thrown up in the ocean. Not a shrub of any kind nor any thin green (except moss which covers the highest parts) grows on this island.

Mond. Jan. 1<sup>st</sup> 1844 Lat. 31.56 S calm clear and warm.

homeward bound 2700 lbs Sperm Oil.  
Thurs. Feb 15<sup>th</sup> Spoke ship America of Bristol R.S bound to  
Valparaiso very leaky, short of provisions, without Fore-Top  
Gallant sail for flying fish and no spare sail.

#### 11<sup>th</sup> Distant View of Ism. Fernandez.

Sat. Feb 24<sup>th</sup> Came up with this island at 4 P.M. It was  
a calm and beautiful day, not a cloud in the horizon,  
not a break on the surface of the broad blue ocean as  
far as the eye could reach. But a swell or rolling which  
rocked our gallant craft as we lay a viewing the hills  
and valleys of grass.

Sund. Feb 25<sup>th</sup> Lowered 2 boats and went ashore to gather peaches  
and figs which this island produces in abundance as well  
as quinces, cherries, strawberries, and the like. This place it  
is said was once the residence of Alexander Selkirk and  
the famous Robinson Crusoe who were cast away on this  
island. This island has been inhabited a few years past by Spani-  
ards from the coast of South America who have cultivated some  
of the land and erected a few shanties upon it. This is a mon-  
taneous and hilly island which may be seen at a great dis-  
tance in a clear day. The soil in the valleys is rich and productive  
and would produce much that is valuable were it well cultivated  
but owing to the indolence of the Spaniards it now remains  
in its original state with the exception of fruit trees and a  
few small cultivated garden spots. At this place we gathered some  
beautiful peaches, figs, and quinces, which were quite refreshing  
to us at this season of the year after being some time at sea.

Feb 29<sup>th</sup> Spoke ship Daniel Webster of Nantucket 8000 300 sperm.

March 4<sup>th</sup> 1844 Spoke Ship Iris of New Bedford Capt came on board and spent the afternoon.

March 5<sup>th</sup> Spoke Ship Coral of New Bedford 10 Mo. out 950 sperm  
 10<sup>th</sup> Spoke ship Rambler of New Bedford and George of Sag Harbor. We lowered 2 boats and went ashore at 1pm. and gathered peaches, and quinces.

" 12<sup>th</sup> Spoke ship Virginia of New Bedford. At 3 P.M. spoke Bark Henry from same port.

" 14<sup>th</sup> Spoke ship Fanny of Sag Harbor 3 $\frac{1}{2}$  Mo. out bound to the North West Coast. Bought some onions and potatoes.

" 16<sup>th</sup> Saw 2 sail at a distance

A View of St Felix and Bark Equator.

Monday March 18<sup>th</sup> Came up with this island at 1 P.M. and one boat went to the island to fish. This is a dreary and desolate island which presents to the traveler one long mass of rocks. Not a shrub or tree of any kind is to be found on the island. A short distance from this is small island called Ambrose. this is level in some parts and hilly in others, and produces some kinds of shrubs and a kind of coarse grass in which birds build nests. These islands are small and uninhabited. At this land we spoke the Bark Equator of New Bedford 5 Mo. out 30. Sperm

A View of Tayta Peru.

April 10<sup>th</sup> Came up with this port at 10 A.M. Capt went ashore with letters and bought sweet potatoes. This place is situated at the foot of a large sand bank. The country back is a barren desert of sand and loam without a tree or shrub or any signs of vegetation. Their produce is brought a great distance and

their water 9 miles. The buildings are composed chiefly of bamboo and mud, and principally one story high. The inhabitants are mostly Spanish dark complexion, black hair, and black eyes. Very fond of smoking and drinking.

Sund. April 21<sup>st</sup> Saw a school of sperm whales lowered. 4 boats stroke 3 oars and caught nothing.

Tues. April 23<sup>rd</sup> Spoke Barque Equator and sailed in company with her to Chatham Island.

### A View of Chatham Island.

Wednesday April 27<sup>th</sup> At 1 PM came to anchor at this island 2 boats went to the island to gather Terrapins. At this place we painted ship. This is a barren and rocky island covered with small trees and shrubs. One small hut situated on the shore is the only building on the island and belongs to an Englishman who lives here and employs several men to gather Terrapin oil which is worth when taken to the coast \$1.50 per gallon. These Terrapin are excellent food. Their meat resembles that of a chicken when it is cooked and is very good eating. They are taken in large quantities by whale men. They will live 6 or 8 months without food or water and do not appear to loose in flesh during the time. Capt. G. purchased 70 of the Englishman which together with those we caught amounted to 90.

Thurs. April 29<sup>th</sup> Weighed anchor and shaped our course for Charles Island another one of the Galapagos.

Fri. April 30<sup>th</sup> Came to anchor. Traded with the natives for sweet potatoes and bananas. This island is inhabited by transports from Columbia who cultivate the land and raise sweet-potatoes and some corn which they trade with Masters of ships for nothing.

Saturday Spoke ship Isabel of New Bedford 33 months out 2300 lbs sperm oil.

Sunday May 1<sup>st</sup> Spoke George Porter of New Bedford. May 18<sup>th</sup> Sounded for whales and caught 2 small ones.

24<sup>th</sup> Spoke ship Boy of R.I.

June 1<sup>st</sup> 1844 Spoke Bark <sup>Mr</sup> Franklin of Bristol R. I. and  
Bark <sup>Mr</sup> Fellows of Stonington.

Redondo Rock Lat 0° 15'. N. Long 91° 34' W  
June 1844 Spoke Bark George Porter of N- Bedford. At  
2 P.M. saw whales lowered and fastened and  
lost the whale.

Palmer

A View of Mecamis S.A.

June 19<sup>th</sup> At 4 P.M. came to anchor and 1. boat went ashore  
after fruit, and returned with oranges, pine apples  
and plantains. At this place we recruited ship  
with fruit and water. Mecamis is a small place on  
the coast of S America surrounded by forest and fruit  
trees. The buildings are made of bamboo set on timbers  
10 or 12 feet long driven in the ground so as to prevent be-  
ing disturbed by the wild animals. Oranges, and plantains  
grow here in great abundance with but very little culti-  
vation. The soil is rich and would produce much were  
it well cultivated but owing to the indolance of the in-  
habitants it remains in its natural state except a few  
small plantations here and there which are cultivated by  
the women. The inhabitants are Spanish who live an  
idle life and the women are compelled to perform the labor  
in houses and out. The men are fond of drinking and  
smoking and spend much of their time in this manner.  
They have many holy-days and dances called *San-dangos*  
which they make a great account of. The building where  
they dance is made like the others with the exception of the  
floor which are timbers hewn down to the thickness of  
planks. On one side of the room is an instrument about  
6 feet long made principally of bamboo. There are a num-  
ber of bamboo sticks of different lengths fitted with shells

and small stone. A stick is placed across the ends of the bamboo and is attached to two long pieces of wood which are suspended by strings at each end. A man strikes on those with two small sticks which produces a sound. In front of this are 4 other men 2 with each a bamboo 3 feet long filled with shells and stone which they shake. The other 2 have each a drum which they beat with their hands. When they dance they are generally barefoot and when tired they seat themselves on the floor and another supplies the place. This dance (or worship as they call it) they keep up sometimes for a week in succession, on night and day.

Sund. June 28<sup>th</sup> All hands on Liberty except one boats crew. 3 men deserted.

Moond. " 24<sup>th</sup> On Liberty in company with 4 others.  
Thurs. " 27<sup>th</sup> Weighed anchor set sail in company with the Callao and shaped our course off shore.

Sat. July 27<sup>th</sup> saw sperm whales Lowered 3 boats 25 minutes from the ship the starboard boat had a large whale spouting thick blood.

Sund. July 28<sup>th</sup> At 5 P.M. saw whales at 9 P.M. the waist boat brought a large whale along side.

Thurs. August 2<sup>nd</sup> Spotted ship Cora of R. Bedford 1150 sperm.

Sund. August 4<sup>th</sup> 1844 At 10 A.M. saw whales lowered 3 boats  
the waist boat was capsized and the larboard boat  
stove but the bow boat succeeded in getting the whale

Tues " 17<sup>th</sup> Sat. 6.03 S Long 97.00 W saw whales and  
lowered 3 boats and caught nothing.

Sund " 22<sup>nd</sup> At the Galapagos spoke ship Abigail  
of N.Y. Bedford 400 sperm.

Mond " 30<sup>th</sup> Came to anchor at Somberz Peru. At  
this place we recruited ship with fruit and water. Ship Boy  
and Barks Trans Alin and Equator lay at anchor at this port.  
This place is said to be the best place on the coast for recruiting  
a ship. We have bought 60 bushels of sweet-potatoes, oranges,  
and water-melons in abundance. The land bordering on the  
river is well adapted to the cultivation of plantains, bananas,  
and sweet-potatoes. Back from the sea is hilly and mountainous  
covered with trees and shrubs. In this place and many other  
parts of South America they have no roads which renders it  
difficult for strangers to travel without a guide. Near  
the shore is a few houses but the principal town is 9 miles back.

Sund. " 5<sup>th</sup> Saw whales the waist Boat caught one

Mond Jan 20<sup>th</sup> At 10 A.M. Spoke Ship Clemintine of  
Bremen Germany 12 mos out 1700 Wt. Whale 330 speron  
6000 lbs ship.

Thurs Jan 23<sup>rd</sup> Saw whales did not lower.

Sat Feb 1<sup>st</sup> Saw whales lowered 3 Boats and caught nothing.

A View of Magdalena Sat 10.25 S Long 138.51  
Tues. Feb 25<sup>th</sup> 1845 Saw Magdalena one of the Marquesas  
Wedn. Feb 26<sup>th</sup> Went on shore and traded with the natives  
for swine and coconuts. This is a very uncavent and mountainous  
island with sharp high peaks which reach to the clouds.  
This land is inhabited by a race of beings from 5 to 7 feet high  
who go almost entirely naked. They are of a black and copper  
complexion with black hair and black eyes. Their fashion  
of wearing the hair is somewhat singular. The men have theirs  
shaved about 2 inches in width round the head with a long  
cue on the top tied with a string, and if in war they conquer  
their enemies the hair is taken from their heads and worn around  
their ankles. and considered a badge of honor. The women are  
small and fair complexion, they wear their hair long, and the  
black raven curls hang down upon their shoulders. They subsist  
principally on coconuts and bread-fruit which grow in great  
abundance with the addition of a few fish, and sometimes a  
wild hog. They are a savage warlike race and are often at variance  
with the inhabitants of other islands. A few of the head ones can  
talk broken English that they have learnt by trading with masters of  
ships.

Wed. Feb 28<sup>th</sup> In sight of Chevahoa saw a lone whale lower  
and caught him.  
Sat March 2 Saw Otakeite one of the Society islands

A View of Otakeite Sat 17.29 S Long 149.36 W.

Sund. March 27<sup>th</sup> 1845 At 11 AM the Pilot came off to us.  
At 1 PM came to anchor. Otaheite is a beautiful and  
fruitful island producing various kinds of fruit and perhaps  
no island in the Pacific is better adapted to the cultivation  
of almost all kinds that grow in warm climates than this.  
Every thing grows almost spontaneously or with very little  
cultivation. The natives of this island are of copper complexion  
black hair and black eyes. The English missionaries have  
civilized them and erected quite a town. The French of late  
have taken possession of the island and are erecting some quite  
handsome buildings. This place has a beautiful and safe harbor  
but the passage in to it is somewhat difficult. At this place  
we painted and recruited ship with fruit. Our number of  
Oranges was 3000.

Thurs. March 27<sup>th</sup> weighed anchor and shaped our course for  
Japan.

Sund. " 30<sup>th</sup> Saw whales lowered and caught one

Fri. April 1<sup>st</sup> Saw whales lowered 4 boats and caught 5 whales.

Sund. " 11<sup>th</sup> Saw whales and caught one.

Mond. " 14<sup>th</sup> Saw whales. The Starboard and waist boat  
fastened to different whales. Starboard boat  
was stove and waist boat ~~done~~ <sup>parted</sup>.

caught neither of the whales.

Wednes. " 30<sup>th</sup> Came to anchor at Mowee one of the Sand-  
wich islands

MISSIONARY

### A View of Mowee Lat 28° 50' N Long 155° 50' W

This and most of the Sandwich islands are hilly and mountainous  
and produces many vegetables that grow in America, but they are  
not so well adapted to various kinds of fruit as the Society Islands.

The American missionaries have been residing here for a number  
of years and have civilized and enlightened the natives and erected  
dwelling houses and houses of public worship and a seminary for the

education of the natives which is quite an elegant building for this part of the world. The natives of this place are similar to those of the South islands in form and complexion but their language is somewhat different. At this place a great many ships recruit with water and vegetables which makes an excellent market for their produce. At this place we obtained sweet and Irish potatoes, yams, squashes, and watermelons.

Wednesday May 7<sup>th</sup> Left Monree for Japan.

Monday, " 26<sup>th</sup> Sat 29.30 S. Long 170.60 E Saw whales lowered caught nothing whales going to windward.

June 1<sup>st</sup> Sat 30.25. Long 167.60 E saw whales on our lee lowered and caught nothing going to windward eyes out.

Sat, " 7<sup>th</sup> Saw whales and caught nothing. Spoke ship Zephyr of New Bedford 24 mo out 800 sperm.

Monday, " 9<sup>th</sup> Heavy Thunder shower.

Tuesday, " 20<sup>th</sup> Spoke ship Rodman of New Bedford 22 mo 1000 sperm. Saw whales lowered the waist boat fastened and was stoved. At 6 P.M the Starboard boat brought the whales alongside.

Monday, " 28<sup>th</sup> Saw whales lowered 3 boats the Starboard boat fastened and killed the whale.

July 3<sup>rd</sup> At 4 P.M saw whales lowered the waist boat fastened was capsized lost her line. The Starboard boat fastened to another one and lost her line.

Monohara Sandemic Shunso

A journal of a voyage at sea in the Ship Frances of New-Bedford  
Nov. 1<sup>st</sup> 1843 At 7 A.M. weighed anchor opposite the light House and proceeded onward  
with a light breeze which continued until evening when it began to increase to a  
strong breeze which caused us to reef our Topsails. Many of us were seasick, and being  
unaccustomed to a ship, and the sea; it made it uncomfortable quite for us green  
hands as sailors call us when first entering on the sea to encounter the perils of the  
deep. We were now leaving our native land, perhaps for the first and last time.  
However the night passed off at last and right glad was we to see the morning light after  
spending the first wet and dreary night at sea. Nov. 2<sup>nd</sup> Our breeze continued strong  
during the first part of the day which caused quite a heavy sea; and the rolling and  
pitching of the ship made it very disagreeable to us who were sick. What would  
some of us given for a little Terra Firme about this to set our feet upon! and  
had we then returned to our native land, in the state we then was in, it would  
have been a lucky ship that would caught us the second time. At 5 P.M. we  
spoke a Thermopudite Brig from Guadalupe bound to Portland M.E. the  
crew all sick. 3<sup>rd</sup> The breeze continues strong. Some of us getting better from  
our sickness and are able to perform our duty on deck; while others are below  
rolling from one side of their berths to the other, and wishing they had not left  
their native land, to encounter the hardships of a sailor's life. 4<sup>th</sup> The first 12  
hours calm and pleasant. But the latter part the breeze freshened into a gale.  
5<sup>th</sup> Gale continues. we reefed down to a close reefed Main-Topsail when all  
at once we heard a noise resembling the report of a cannon, and looking  
to our Main-Topsail it was blown to rags and one of the sheets parted which  
caused us to lose what was remaining of it and then we had to lye to  
under a fore-Topsail staysail and Main-Spencer. The sea was running  
mountains high, which would break over our ship and cover us completely.  
Leaving the water on the lee side waist deep, and those of us who had not been  
to sea before had to cling to the rigging with all our might to save ourselves  
from going overboard. Many of us was very weak yet for we had not time  
to gain our strength from sea sickness, and with fear and surprise did we  
gaze upon the mighty billows which came rolling one after another and toss  
our ship about like a feather. 6<sup>th</sup> Heavy sea running which continued  
till 4 P.M. when we hoisted our Topsails, but it was very uncomfortable for  
when the ship pitched she would bury her bows in water which kept the deck  
constantly afloat. During the night the wind abated and sea fell which made  
it rather more pleasant and we were happy to see it after so heavy a gale.  
7<sup>th</sup> Pleasant and agreeable weather during the day. Nothing very remark-  
able occurring worthy of note. 8<sup>th</sup> Good breeze and pleasant. 9<sup>th</sup> Light-  
breeze this morning. Saw a sail on our lee bow being the first we had  
seen since the second day out. we did not speak her she being some dis-  
tance off. Nov. 24<sup>th</sup> Light gale of wind. This morning saw a sail off  
our lee quarter. Dec. 3<sup>rd</sup> Saw land one of the Cape Verde Isl. St. Anthony  
This is a rocky and mountainous Island the highest are covered with mgs but  
the valleys produce Oranges, Coconuts, Sugar-Cane. It is quite pleasant  
to sail near to those islands at this season of the year and in spite the fresh breeze

blowing from the orange groves and sugar-cane fields. How refreshing to any one, and particularly to a young sailor who has just entered on his first voyage who has been sea-dust perhaps most of the time since he first embarked. With what delight does he gaze on the land and the mountains which are here and there with the lofty peaks piercing the clouds, and the valleys covered with delicious fruit. How often does it call to mind the land of his birth which he has so lately left, and cause him to reflect upon his bygone days, and wish himself once more on his native soil. On board of a ship a sailor has many hours for reflection and often when he has a quiet back does he form many resolutions to change his occupation if he should have to return home. But when good weather comes again he forgets all and is as happy here perhaps as any where else. Dec 4<sup>th</sup> Passed in sight of several islands. Saw an English Man of War standing in towards the land. Dec 5<sup>th</sup> Saw St. Jagoes. There are say 100 and one and 2 boats went on shore to trade with the natives. This island is the best perhaps of any of the Cape de Verde. It produces more than any of the group and has quite a large town on one side of it. The inhabitants of this island are Portuguese black and copper complexion black hair and black eyes they are generally very poor and miserably clad and some go entirely naked. We traded with the natives for fowls, swine, and oranges. These articles did not come along at this time more particularly the oranges. we put them into tubs on deck and each one could help himself. Some of them did help themselves rather to freely and made them sick. One young man during the first watch was enjoying himself eating when one says Frank! how many oranges have you ate this evening? Why I should think about 30 was his reply. This caused quite a laugh amongst the crew to think a small man like him should eat so many at one time. At this island we stopped 2 days and then set steaming sail for Cape Horn. Dec 14<sup>th</sup> Saw a sail a point off our lee bow. 15<sup>th</sup> Crossed the Equator. 16<sup>th</sup> Saw Martinmas Rocks. This is a huge mass of rocks thrown up in the ocean some distance from any other land it has many sharp peaks and some of them a short distance from the largest are of a very queer form occasioned by the dashing of the waves. Not a shrub of any kind or anything green grows here even on the largest which is quite an island. Jan. 7<sup>th</sup> 1844. Lat 32°. Saw sperm Whales. These was the first spouts of sperm whales I ever saw. We did not lower for them they being some distance off and it was very calm. 11<sup>th</sup> Lat 40.30° S Long 58.30° W. We experienced a gale which lasted about 12 hours. 24<sup>th</sup> Saw a school of Finback Whales. They came very near to the ship so we had a good view of them. These were the first whales we had seen so near to the ship, and those of us who had not seen any before took quite an interest in watching their movements. Some of them were quite large and made great display of themselves. 25<sup>th</sup> Saw Staten Land. This is a desolate island with sharp high peaks which are always covered with snow, in the valleys grow some kinds of vegetation on which the wild boars subsist. These animals are quite numerous here and are taken by the Patagonians and occasionally by ship companies. 26<sup>th</sup> Saw a barge in need to the land she ran down across us and we exchanged signals. 28<sup>th</sup> Lat 58.31. Saw 5 sail

harbor other 2 shipp's names not known. A boat come off to us from the Peruv-  
ian supporting we belonged to the same port. Their Capt. had been rather unfor-  
tunate he caught a fall on deck and broke his ankle. This ship was bound to the  
North West Coast for N.W. Whale. They had 35 men, including Officers. At 5 P.M. Spoke  
the ship Hudson of Sag Harbor bound home 45 months out with a full cargo of  
N.W. Whale Oil. 29° Lat 56.38° S These 24 hours a gale of wind. Feb. 7th Spoke Ship  
Henry of Nantucket homeward bound. 8° Lat 58° 4' S Long 75. W. Cold and  
squally. This is a very disagreeable place off Cape Horn subject to frequ-  
ent gales of wind attended with rain and sleet which make it very disa-  
greeable even in the summer season. The decks are for the most part  
of the time covered with water which keeps any ones feet wet continually  
and then the frequent squalls of rain together with the sea breaking upon de-  
cks drenches a person completely from head to foot so that at the end of a 24 hour  
watch he seldom has any dry clothes about him. This Cape Horn is often  
spoken of with a shudder among Seafaring men, and more by those who  
are going from the Atlantic to the Pacific on account of the head winds which  
generally attend them. Ships have sometimes wrecks and often founder  
against a head wind and finally are obliged to abandon the place and go around  
Cape Good Hope. 11° Lat 42.45° S Sent up fore Main and Mizzen Royal M-  
asts. Saw a sail astern of us. 13th Spoke Ship James of New Bedford 15 months  
out. Discharged 1500 hds of N.W. Whale Oil in Riojanario. bound to the Na-  
orth West Coast of A. I. The Capt. and boats crew came on board and stop-  
ped during the day. 14th Spoke Ship John Wells of Newark N.J. homeward bo-  
und 2700. 26th Spoke Ship America of Bristol R.I. bound to Valparaiso  
very leaky, short of provisions without fore Top Gallant sail or Flying Jib and no  
spair sail. Came on board and we gave them some provisions. Spoke a short time  
more and then our parted company. 24th Saw the island of Juan Fernandez. Came  
up with this island at 4 P.M. It was a calm and beautiful day, not a cloud in  
the horizon not a break on the surface of the broad blue ocean as far as  
the eye could reach but a swell or rolling which rocked our gallant craft  
as we say a viewing the hills and valleys of Juan. This is a mountain-  
ous and hilly island and may be seen at a great distance in a clear day.  
The soil in the valleys is rich and productive producing many kind  
of fruit that grow in the States and would produce much that is  
marketable were it well cultivated but the Spanish government  
do not allow people to remain on the island. Once they sent convicts  
to this place and soldiers to guard them and during their stay they erected  
a fort and some small huts whose ruins are still to be seen. The fruit  
trees are Cherries, peaches, quinces, and figs. The peaches grow almost upon  
tanniously, every bush three feet high seems to be growing under its burden.  
Among the animals are some beautiful horses which may be seen  
in the valleys, a grazing; and on the sides of the mountains are wild  
goats in abundance. We cruised on the island sometime and gathered  
peaches, and quinces, but they were not quite ripe. Went to sea and after  
10 days returned and found them ripe and gathered large quantity.

Feb. 29<sup>th</sup> Spoke Ship Daniel Webster of Nantucket 8 Mo. out 300-  
Bbl Sperm oil. March 4<sup>th</sup> Spoke Ship Iris of New Bedford Capt came  
on board and spent the afternoon. 5<sup>th</sup> Saw Whalers and went  
to the island a fishing. This is a mountainous island and quite high  
and in a clear day a person may <sup>see</sup> Juanfernandez with the naked eye from  
the highest parts. At this place Spoke Ship Coral of New Bedford 8 Mo...  
out 950 Bbl sperm oil. Capt. came on board. 10<sup>th</sup> Spoke ship Chamber of  
New Bedford and George of Fairhaven. We lowered 2 boats and went  
ashore at Juanfernandez and gathered peaches and quinces. 12<sup>th</sup> Spoke  
Ship Virginia of New Bedford at 3 P.M. Spoke Barge Henry same  
port.
